

Problem Statement No. 15– Agentic Career Counseling Companion

The Challenge – Students often struggle to make informed career decisions due to fragmented access to

guidance, limited self-awareness of academic strengths, and rapidly evolving industry landscapes.

Traditional counseling methods lack personalization and scalability, leading to missed opportunities and

career mismatches. The challenge is to develop an intelligent, autonomous agent that continuously

monitors student performance, evolving interests, and real-time labor market trends to deliver tailored

career pathway suggestions. This would empower students to make confident, future-ready decisions

with minimal dependency on manual intervention.

Technology – Use of IBM Cloud Lite services / IBM Granite is mandatory.
